

Use a scanner, digital camera or import images from your files

Computer Linked Cutting System

Use the Computer Linked Cutting System to cut out Creative-Flex or Creative-Flock material. Highly suitable for single colour print or overlays (Multiple colours). This Cutting System can also be used to contour cut images produced on transfer paper when used in conjunction with a full colour laser Printer.

Simply heat press transfer onto garments using one of our heat presses. It takes around just 25 seconds to print a T-Shirt!

Full Colour Laser Printer

Use our full colour Laser Printer to produce transfers for light and dark garments.

Once a transfer has been printed, simply place transfer on garment and heat press for about 25 seconds - and your garment is now ready to wear!

You can also contour cut around laser printed images using the Cutting System

Sublimation Printer

Print full colour photos and images onto photo quality inkjet paper using a Sublimation Printer. This creates your transfer.

Place the transfer onto one of over thirty different specially coated products and heat press for a specified time using one of our heat presses (ie. a T-Shirt Press for T-Shirts, Coasters, Mousemats, Jigsaws etc., and a Mug Press for Mugs).

Over 23 colours available in Creative-Flex. Print onto light or dark garments.

Example of overlays

Cutting System contour cuts too!

Over 30 different sublimation products available!
